## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 11-19 and 23-32 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of Bright discloses a continuous process for controlling a hot melt adhesive dispensing system utilizing sensors which are connected to a controller and senses parameters such as temperature and tank height and uses such parameters to control the heating unit.
3. Hoffeman discloses a process of using a barcode to determine the contents of a container holding a lacquer in order to prevent opening and closing the container when a particular lacquer is ready for use in a process. The barcode can also be used to input application data to control the spraying process.
4. Sasaki et al. (US 5882451) discloses a process applying an electronic component adhesive to an electrical component where the adhesive shape can be controlled by inputting the desired shape into a computing unit, and the application nozzles are automatically controlled to apply the desired amount of adhesive under optimum application conditions using previously stored data (see abstract, col. 1, lines 36-54). Sasaki et al. fails to teach or suggest inputting the type of adhesive into the computing unit rather a desired final shape provided.
5. The prior art fails to teach or suggest wirelessly receiving information from a machine readable element in a hot melt adhesive system and using the received information to set a system condition. Although it is known to provide barcodes in the

Art Unit: 1792

process of applying a lacquer to wirelessly receive information on the type of lacquer, the prior art fails to show why one of ordinary skill in the art would use a barcode to identify the contents especially since the process of Bright uses a continuous process where only one type of adhesive is being used while in the art of Hoffeman, the barcode is used because various lacquers having different colors, etc can be used therefore it is important to use the barcode to prevent opening and closing the containers during the coating process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
